Notification

I&L/CEE/902/66/3324

In exercise of the Powers conferred under Section 23 read with Section 58A of the Indian Electricity Act 1910 the Govt. of Goa, Daman and Diu is pleased to frame a uniform tariff given below for the entire Union Territory of Goa, Daman and Diu in substitution of the existing tariff prevalent in various places of the Territory. This rate schedule will be made effective from 1st Nov. 1966 i. e. energy consumed during the month of Nov. or major part thereof will be charged at the revised Tariff.

The revised Tariff is, however, provisional and is subject to the approval of the Govt. of India.

Electricity Supply Tariffs

Effective from 1st Nov. 1966.
(Provisional)

I. General Conditions

- 1) These tariffs supersede all tariffs so far in force in the Union Territory of Goa, Daman and Diu.

- 2) These tariffs are subject to revision by the Government from time to time.
- 3) These tariffs are subject to the terms and conditions for power supply approved from time to time by the Govt.
- 4) Supply of power in all cases is subject to execution of Agreements by consumers.
- 5) Unless otherwise agreed to, these tariffs are applicable to *each* point of supply and for installations which are located reasonably near the power lines and feeders of the Electricity Department.
- 6) As a general rule, no Low Voltage service will be given where the connected load per service is over 100 KVA nor High Voltage service will be given where connected load is less than 100 KVA. Exceptions may be made in special cases at the discretion of the Chief Electrical Engineer.
- 7) If energy supplied for a specific purpose under a particular tariff is used for a different purpose not contemplated in the contract for supply and/or for which higher tariff is applicable, it will be deemed as mis-use and stealing of energy within the meaning of the Indian Electricity Act, 1910. In that case, the energy consumption bills already rendered for the service shall be revised charging the appropriate higher tariff from the date of connection unless convincing reasons are adduced thereof for adopting a different period. The imposition of this higher rate will not relieve the consumer from any penalties imposed by the law.
- 8) Surcharge of one percent compound per month or part thereof will be levied on all delayed payments of bills rendered under any tariff Schedules. Consumers are also liable to have electrical supply disconnected after seven days notice if bills are overdue for more than the permitted period without prejudice

to the rights of the Electricity Department to recover amounts of the bills and surcharges thereon.

- 9) Consumers requiring supply for loads not covered by these tariffs and also Electro-chemical and Electro-metallurgical industries which are electricity intensive, may negotiate for special rates with the Electricity Department.
- 10) In cases of doubts or anomalies in respect of categorisation of any consumer, the decision of the Chief Electrical Engineer shall be final.

2. Definition

- (1) *Connected load* means the sum of the rated capacities of all the energy consuming devices which can be operated simultaneously.
- (2) *Seasonal consumers* mean all consumers who work only during a part of the year upto maximum of nine months such as cotton corning and pressing factories. It shall also include ice factories, oil mills, which may work throughout the year but intermittently, and any such factories as may be approved by the Electricity Department from time to time as seasonal factories.
- (3) *Maximum demand* means the average KVA supplied during the 30 minutes period (or any such other shorter period as may be prescribed by the Electricity Department) or maximum use, in a month.
- (4) *Contract Demand* means the maximum KVA for the supply of which the Electricity Department undertakes to provide facilities from time to time.
- (5) *Billing demand* means either (i) the actual maximum demand during the month or (ii) 75% of the contract demand whichever is higher.
